Avery 024

stains cells, body fluid and blood components for pathological analysis

Automatic Slide Stainer

one instrument, dual usage

multiple modes, customizible options

Stain Sedimentation <10s (high consistancy) Dimensions

Net Weight 78kg Sample Positions 12 (4 × 3, each group can work independently)

24 (supports any number of tasks range from 1 to 24) Input Power 420VA

KEYLIGHTS (SHENZHEN) | KEYLIGHTS BIOLOGICAL TECHNOLOGY | CHONGQING KEYSMILE BIOLOGICAL TECHNOLOGY CO., LTD | TECHNOLOGY CO., LTD

STAR YB-6500

connect instruments together compatible with lab workflow of the third party

Automatic Sample Transportation System

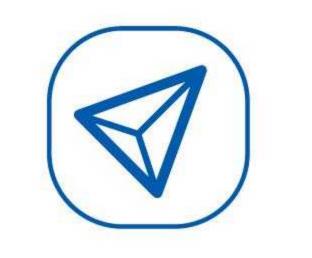

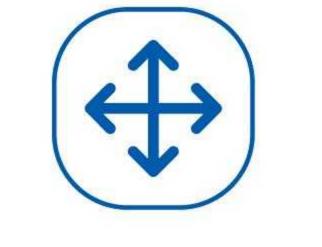

high efficiency

Open · Automatic

various assay principles

up to 4 instruments

STAT sample loading

Throughput 360 T/h/instrument, 1440 T/h with 4 Instruments connected

Sample Position 384 sample storage positions Transportation Rail unique one-lane design, continuous loading

Reagent Position 24/instrument, with refrigeration, 96 verified assays

KCARD

open system, customized services available support all kinds of POCT tests cassettes

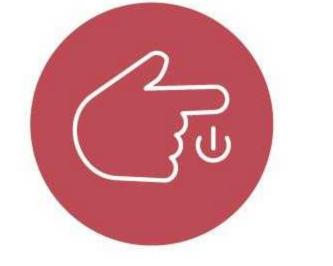

Automatic POCT Detection Platform

load cassette

load sample

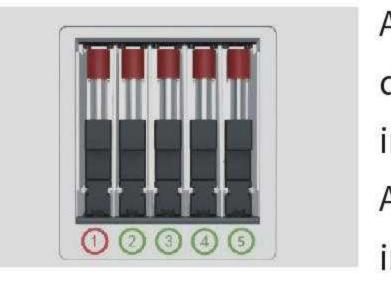

start test

KCARD 200 series

dispensing, dilution, mixing,

Optional automatic whole blood mixing module

Throughput 120T/h Sample type serum, plasma, whole blood, peripheral blood, urine

Sample Positions 30, continuous loading and replacement Reagent Positions 5 × 50 test cassettes

Global CDMO For IVD Instruments

All Series

Provides IVD instrument solution for reagent manufacturers

Automatic Slide Stainer

Automatic POCT Platform

Automatic Chemiluminescence Immunoassay Analyzer Series

Automatic Sample Transportation System

Venus 100 series

High Precision, Good Repetition, Small And Exquisite, STAT Assay Anytime

Automatic Chemiluminescence Immunoassay Analyzer

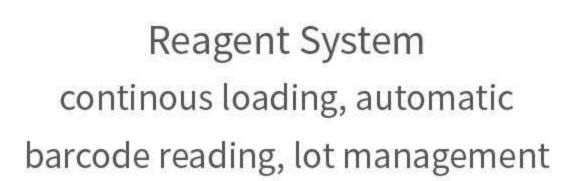

SMART 500 series

small and agile, fully featured, constant throughput:120T/h

Automatic Chemiluminescence Immunoassay Analyzer

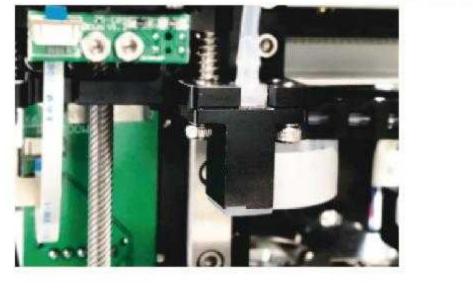

Dispensing System remaining detection, aspiration failure alert, clot detection alert

Carryover <1ppm Dimensions 500mm*665mm*668mm Precision CV≤3% Reagent Positions 15

Sample Positions 24 STAT Sample load at anytime RVs 130, load in trays at any time

Operation System powerful internet of things, smart control, simple operation

10.1-inch touch screen 24x7 online technical support and maintenance

40 sample positions, automatic sample dilution supported

open platform for various assays, supports AP, HRP, or AE assays

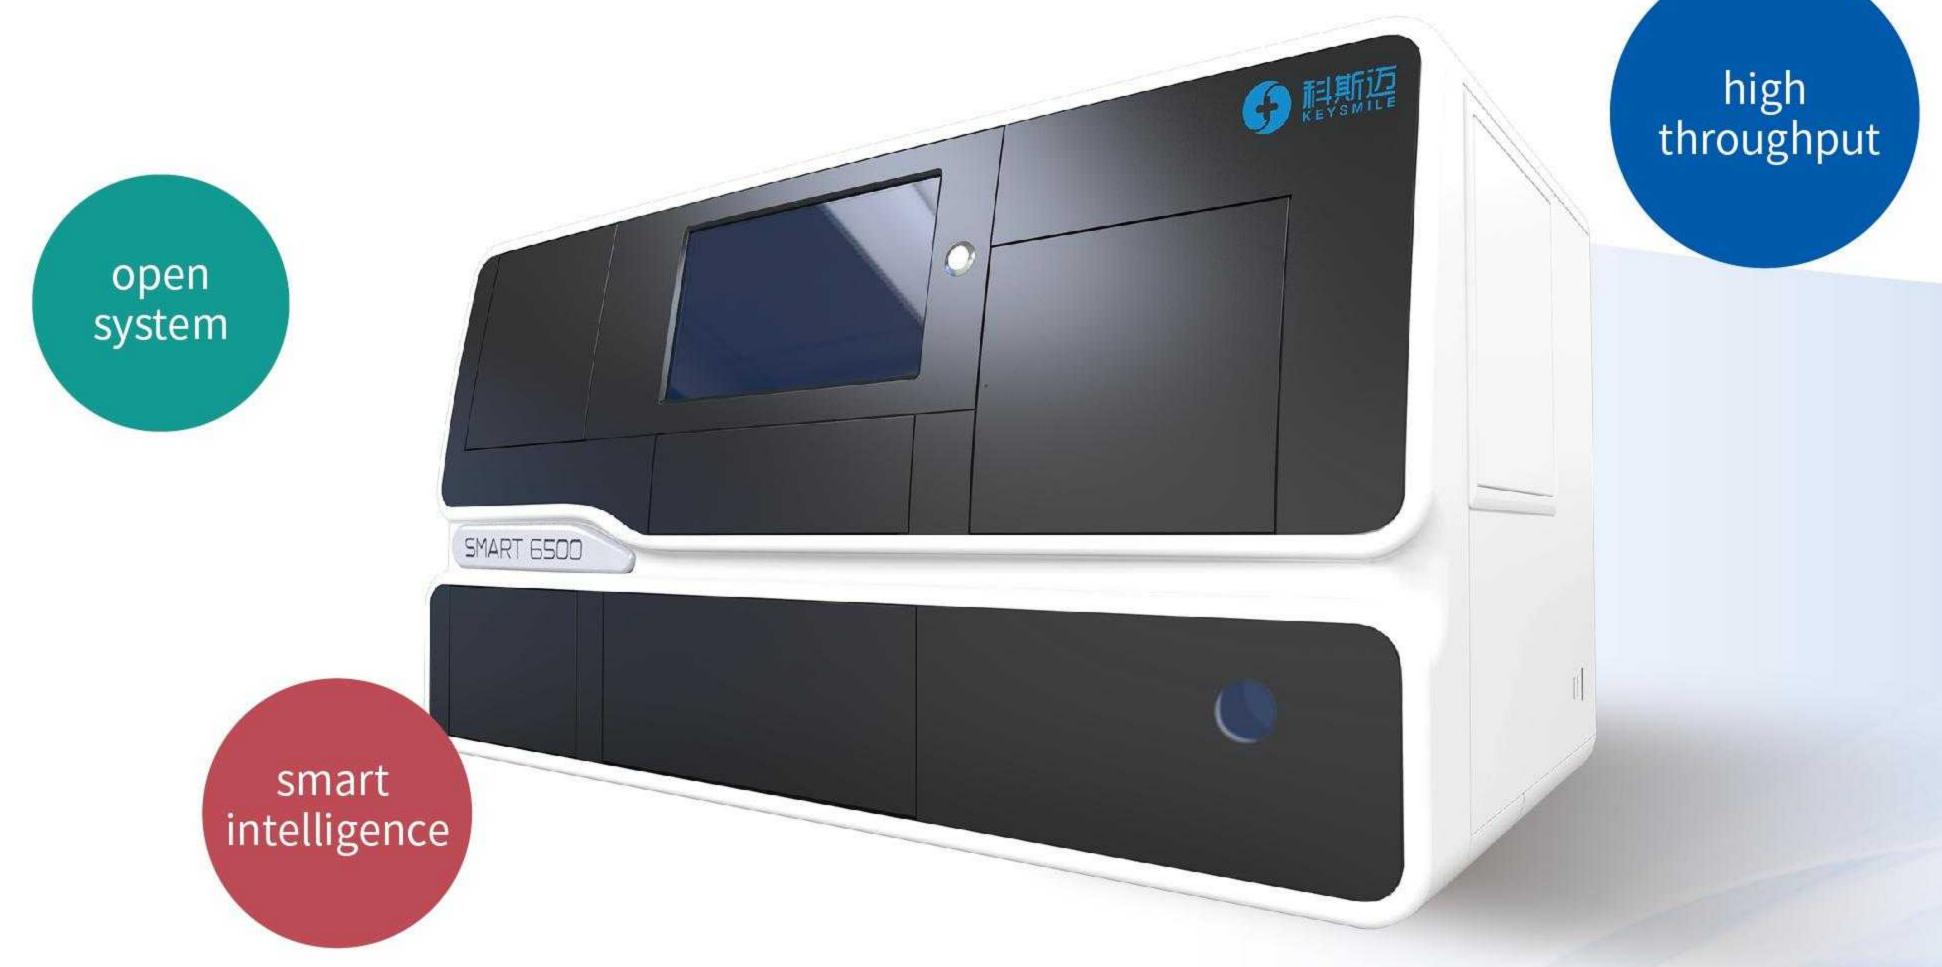

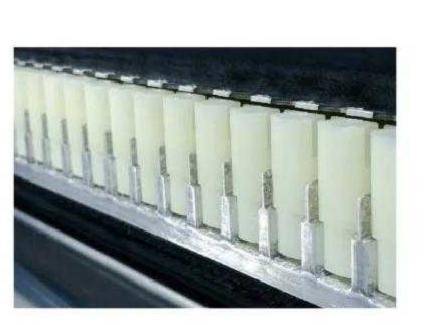

SMART 6500 series

360T/h, connectable with STAR YB-6500 to achive even higher efficiency

Automatic Chemiluminescence Immunoassay Analyzer

minescence detection system carryover contamination rate

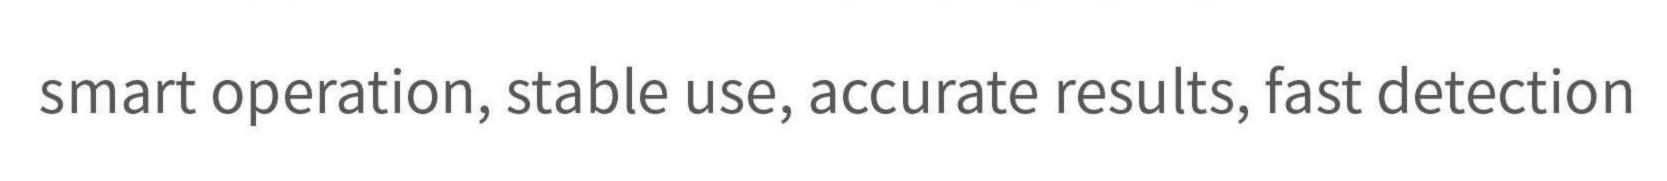

cleans steel pipettor with special provides customized services for process to effectively control the different reagent manufacturers in

RVs ≥1000, automatic alignment, loading by pouring Throughput one-step assay 360T/h

Reagent Position ≥ 24, with refrigeration, continuous loading Sample Positions 96, replacement at any time

experience with industry leading IoT technology

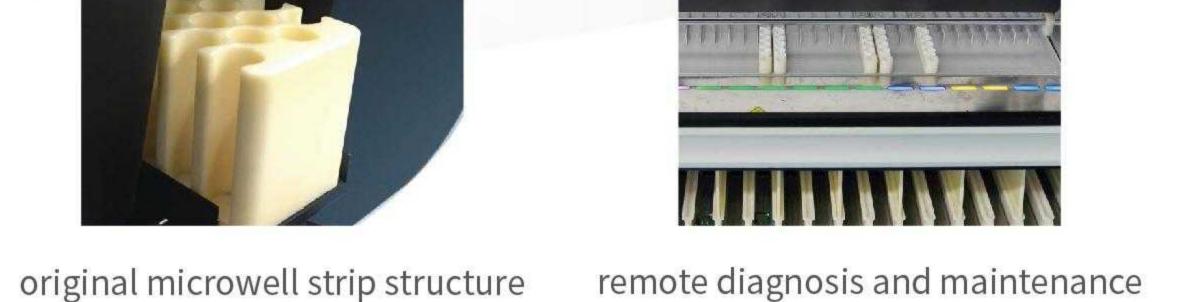

SMART 3000S

Automatic Chemiluminescence Immunoassay Analyzer

Dimensions 920mm*495mm*510mm Throughput one-step assay 280T/h
